Morgan Tamayo

Experienced Data Analyst and Statistical Modeller Leveraging Data-Driven Insights to Drive Business Strategy

Atlanta, Georgia, United States

Summary

I'm a data scientist who provides automated and predictive data models that help clients meet their objectives and key results. I've worked with marketing, financial, and insurance teams to provide dynamic solutions using SAS, Python, R, SQL, and Microsoft Excel.

Experience

Blue Cross and Blue Shield of Alabama

2 years 6 months

Healthcare Analyst II

February 2026 - Present (5 months)

Birmingham, AL

Built and validated SQL queries within a large data warehouse environment (health insurance claims and reference tables).

Created data visualizations in Tableau for web focus applications, continuously updating them based on stakeholder requirements and input.

Managed projects from concept to deployment, translating business needs into dashboard applications.

Migrated SQL queries to Bitbucket, ensuring accuracy and consistency.

Improved external-facing WebFocus applications in an Agile environment.

Ensured smooth deployments and proper functionality by conducting high quality release testing.

Developed and managed user stories and bugs to ensure alignment with business requirements.

Health Care Analyst I

January 2024 - February 2026 (2 years 2 months)

Birmingham, Alabama, United States

Built and validated SQL queries within a large data warehouse environment (health insurance claims and reference tables).

Created data visualizations in Tableau for web focus applications, continuously updating them based on stakeholder requirements and input.

Managed projects from concept to deployment, translating business needs into dashboard applications.

Migrated SQL queries to Bitbucket, ensuring accuracy and consistency.

Improved external-facing WebFocus applications in an Agile environment.

Ensured smooth deployments and proper functionality by conducting high quality release testing.

Developed and managed user stories and bugs to ensure alignment with business requirements.

Hawkeye

Data Analyst

December 2019 - January 2024 (4 years 2 months)

Atlanta, Georgia, United States

Acquired, cleaned, and analyzed data sets, including both vendor and internal data.

Provided recurring market share/flow share analytics to track customer behavior.

Automated deliverable processes and performed ad hoc analyses using SAS.

Ensured high data quality by identifying and rectifying errors.

Blue Cross Blue Shield of Tennessee

Data Scientist

May 2018 - July 2019 (1 year 3 months)

Chattanooga, TN

Collaborated on healthcare data analysis, focusing on enhancing the physician performance rating system within the "Episodes of Care" program.

Utilized Python, SQL, and Natural Language Processing (NLP) techniques for data preprocessing and analysis.

Developed and applied an algorithm to assess and group physicians based on treatment behaviors and associated costs.

Kennesaw State University

Graduate Research Assistant

January 2018 - May 2018 (5 months)

Kennesaw, GA

Graduate Research Assistant for Department of Statistics and Analytical Sciences at Kennesaw State University. Analyzed student's performances in introductory to chemistry courses, provided analysis of textbook representations and ETS data.

The Tutoring Center

Tutor

February 2016 - November 2017 (1 year 10 months)

Marietta, Georgia, United States

Tutored children K-12.

Concentration in Math, Writing, and English.

Prepared students for upcoming exams.

Education

Kennesaw State University

Master's degree, Applied Statistics · (August 2017 - July 2019)

Kennesaw State University

Bachelor of Science (B.S.), Mathematics · (August 2012 - December 2016)
